## 1. Safety instructions

- All modifications to the device will void the warranty.
- Repairs are to carry out by skilled personnel only.

### 1.1. FOR SAFE AND EFFICIENT OPERATION

#### **Be careful with heat and extreme temperature**

Avoid exposing the item with the hanging kit to direct rays of the sun or near a heating appliance. Not put it in a temperature bellow 32°F / 0°C, or exceeding 131°F / 55°C.

#### **Keep away from humidity, water and dust**

Do not place the set in a location with high humidity or lots of dust.

Containers with water should not be placed on the set.

#### **Do not use chemicals or volatile liquids for cleaning**

Use a clean dry cloth to wipe off the dust, or a wet soft cloth for stubborn dirt.

#### **If out of work, contact sales agency immediately**

Any troubles arose, contact with an engineer for repairing, do not open the cabinet by yourself, it might result a danger.

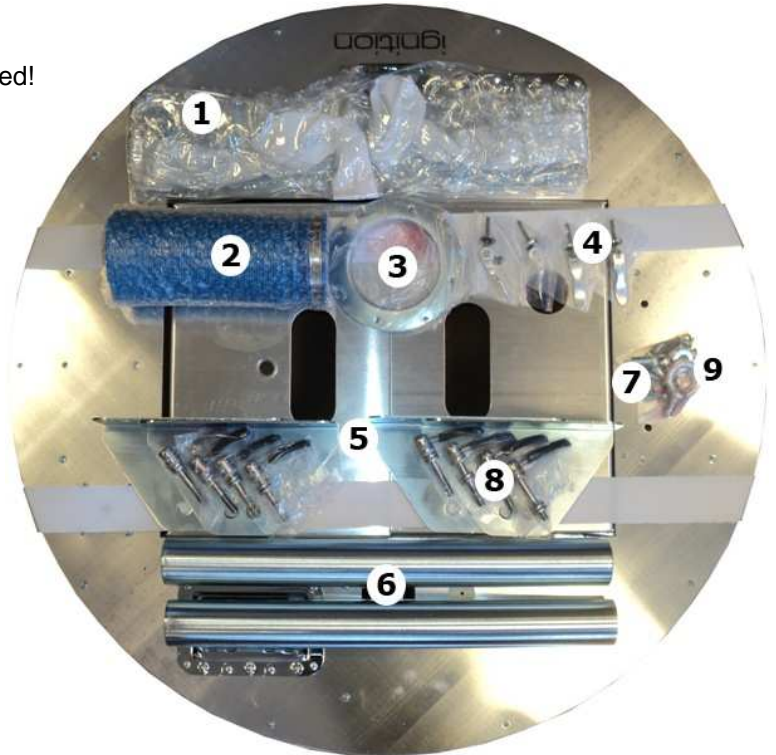

**Important:** Damages caused by the disregard of this user manual are not subject to warranty. The dealer will not accept liability for any resulting defects or problems.

**Make sure the electrical connection is carried out by qualified personnel. All electrical and mechanical connections have to be carried out according to the European safety standards.**

## 2. Content control

Please check if all the needed parts are included!

- 1 x Plasticgrommet with Velcro Tape (1)
- 1 x blue plastic hose (2)
- 1 x holding ring for hose (3)
- 4 x Quicklock screw for holding ring (4)
- 4 x side hanging part (5)
- 2 x middle metal hose for holding part (6)
- 8 x Screw for sidepart/middlepart(7)
- 8 x Screw for holding part base (8)
- 2 x eyelet (9)

## 3. Assembly

### 3.1. Assembling the hanging part

Start your built up with building 2 times the holding bracket.

Therefore you need:

- 4 x Screw for sidepart/middlepart(7)
- 2 x side hanging part (5)
- 1 x middle metal hose for holding part (6)

Connect on both sides the side parts with the middle hose. To do that , use two screws on each side to connect the pieces. Please do that two times to get 2 identical pieces in the end.

### 3.2. Assembling the blue hose

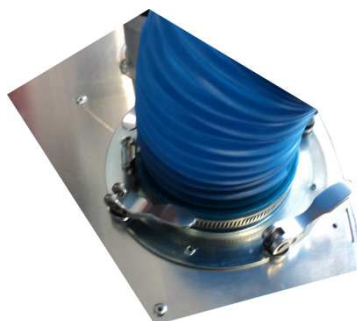

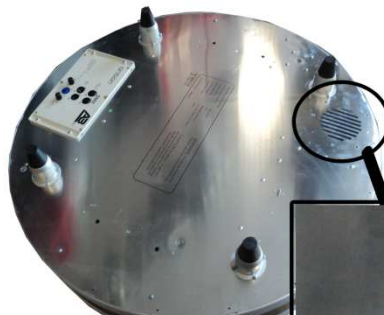

- Take the holding ring for hose (3)
- Take the blue plastic hose (2)
- Push the blue plastic hose onto the holding ring

- Tighten the screw at the ring

### 3.3. assembly of the hose to the Base

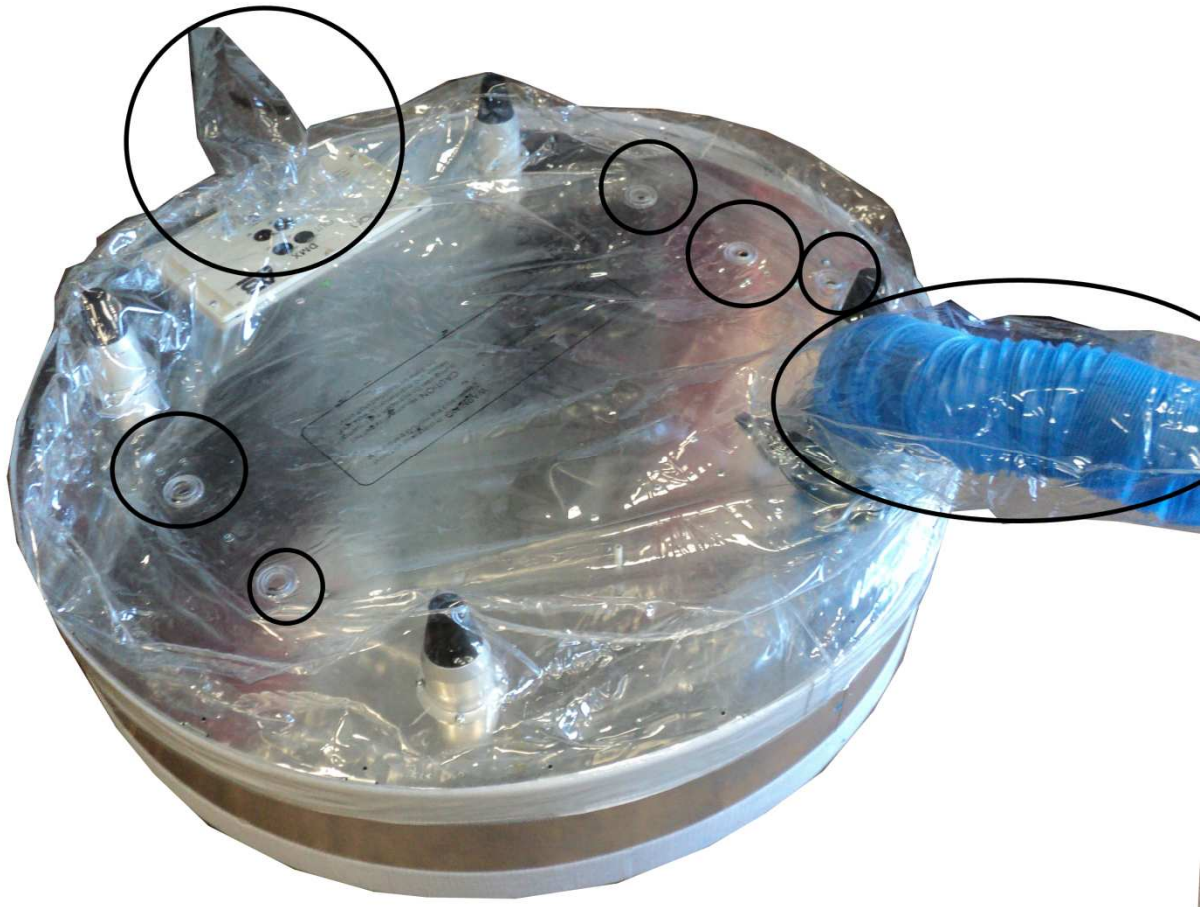

- Turn the Airbase upside down.
- Mount the ring exactly on the grid
- Take the 4 Quikconnector and screw them in until you can close the connector. Now the ring is mounted tight on the grid

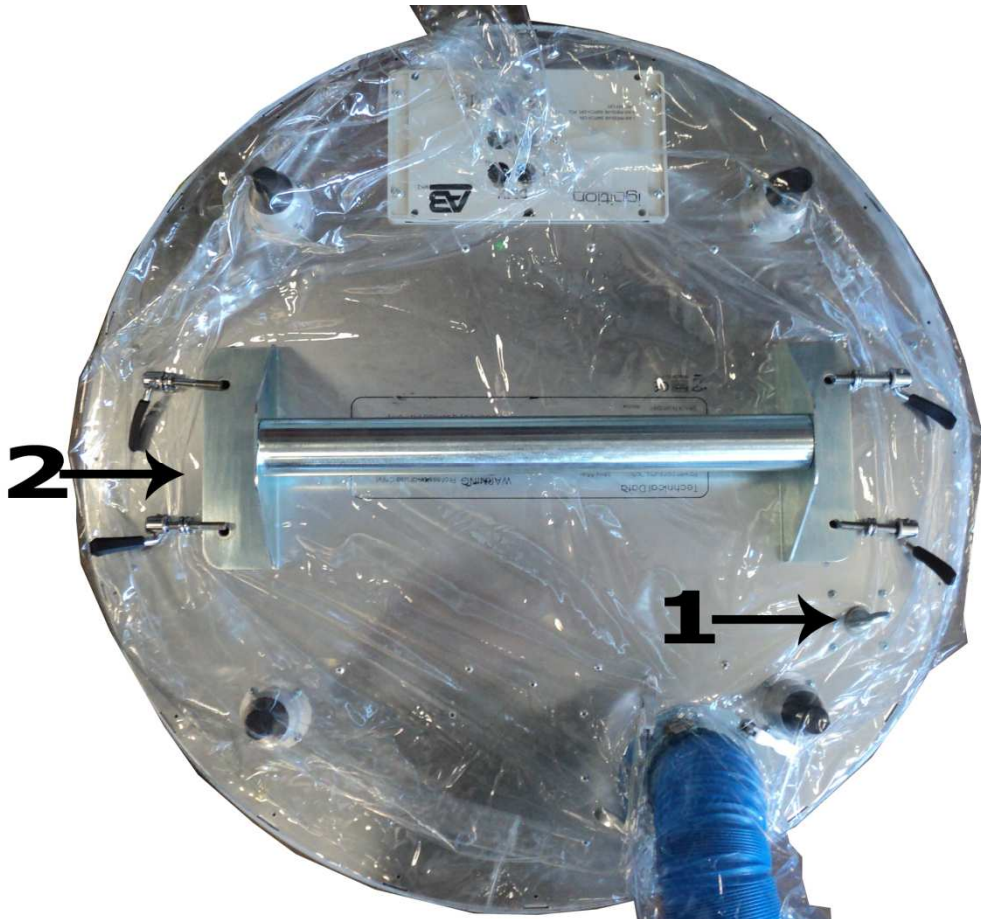

### 3.4. Put on the rain coat

- Put on the rain coat like in the picture
- Make sure that the hose for the blue plastic hose is at the right position
- Make sure that the needed screw hole for the eyelet is at the right position.
- Adjust and fix now the velcro.
- Now there should be a hose above the control unit as well, if you did it right.

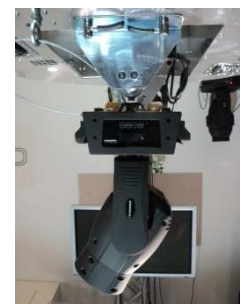

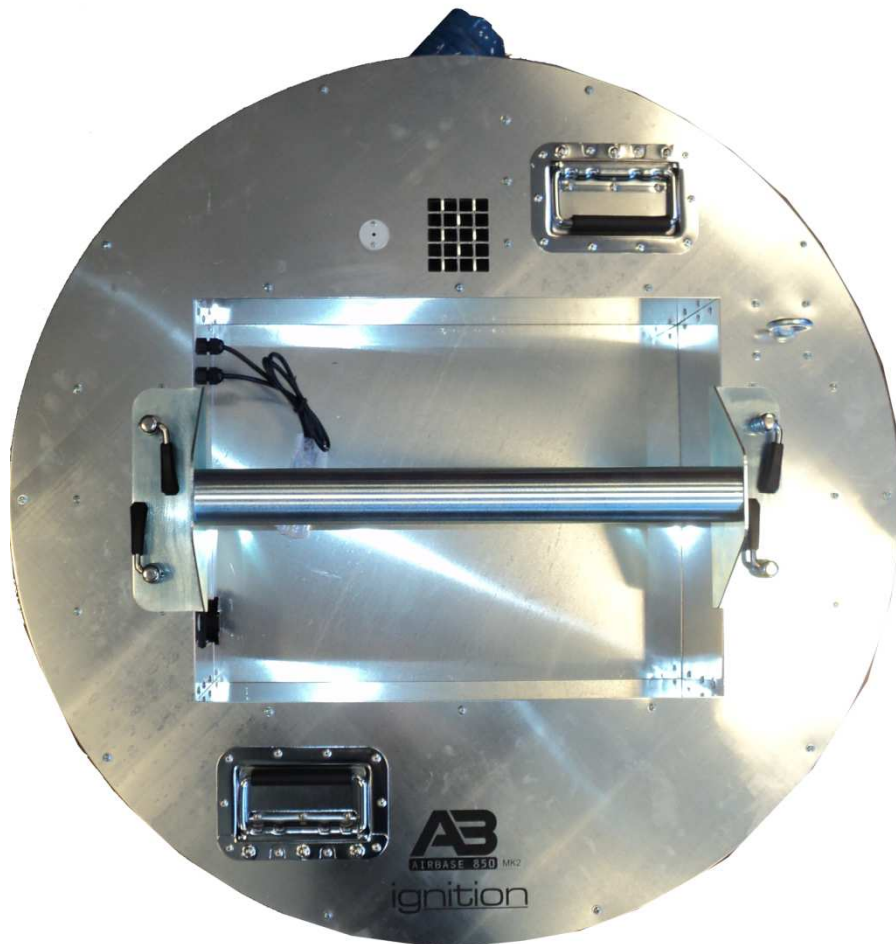

### 3.5. Assembling of the holding brackets

- 1) Mount the eyelet according to the picture.
- 2) Mount one of the two built up hanging brackets onto the base according to the picture. Use 4 of the 8 Quick connector screws to do so. These you have to screw in first, that you can close them.

#### 4. Frontside

The only thing you have to do at the frontside, is to mount the second holding bracket, according to the picture. Use the remaining 4 Quick connector screws to mount the holding bracket, like described above. Now you can use optional a dome to save your item from rain and moisture.
